

Jeans made with a Life Cycle perspective

With size comes responsibility and as a leading manufacturer in denim, we recognize our role in contributing to change. In 2019 we started making Life Cycle Assessments (LCA) and during this year we have accelerated the pace further to include more products to make it possible for all our customers to take advantage of this together with us.

Let's do better, together!

...with EPD for Total Transparency

Based on a Life Cycle Assessment we started to publish Environmental Product Declarations (EPD) on 20 August 2020 where all the steps of our work are described openly, publicly, and with total transparency.

You can use our tutorial to reach the EPDs we have published.

We never stopped our lines

"As you all know, we never stopped our lines as the pandemic hit. Instead, we supported the frontline with medical facemasks. As businesses re-open, trust is perhaps more important than ever before and the TSE Safety Production Certificate is an additional reassurance, both in pandemic times and beyond."

Covid 19 TSE Safety Production Certificate

We were entitled to receive the "Covid-19 Safe Production Certificate" for our enterprises by meeting all the document and field requirements during the audits at Cross Textiles.

The "Covid-19 Hygiene, Infection Prevention and Control Guide" was prepared by the Turkish Standards Institute (TSE), which will be a guide for businesses to combat Covid-19. The guide also provided the certification of the companies' compliance with the reliable and hygienic production standards, which are needed in the post-epidemic period.

Investing in technology for a Brighter Future

"Introducing Automatic Dryers"

As we continue highlighting the importance of workplace happiness, we have introduced a new automated drying system. While it may sound boring at first, it's highly appreciated by our employees as it minimizes the risk of accidents and takes out the element of heavy lifts. As a bonus, it also increases both productivity and quality.

Annual Report of Sustainability Values

As Cross Textiles, we share our economic, environmental and social performance with all our stakeholders in our Sustainability Report, which we published for the first time this year ("Annual Report of Sustainability Values").

The report, as our first sustainability report, has been prepared by taking GRI Standards as a guide. Our report basically covers the calendar year January 1, 2019 - January 31, 2019.

Since it was the first reporting year, we discussed the performance values of Cross Textiles from past to present in the report, and we will continue to publish the report on an annual basis with the updated data that will develop in the coming years.

WE ARE A FAMILY BUSINESS WITH 43 YEARS OF EXPERIENCE IN MANUFACTURING DENIM
